Tough motorbike is ideal for any task

This new deluxe model of the extremely popular Honda 70 step-thru motorbike is well suited for any type of work or play. It is absolutely reliable, with the well-proved OHC 4-stroke engine that powers more than 7,000,000 of these step-thru bikes. It is easy for anyone to ride, with a smooth-changing 3-speed transmission and automatic centrifugal clutch. It is safe even for youngsters, with smooth suspension, simple controls, powerful brakes and bright lights. The light weight and pressed steel backbone frame makes it easy to ride anywhere, even on unimproved roads, trails or off-the-road. The deluxe model includes many improvements, such as the attractive metallic paint colors and a plastic front fender that bends instead of breaking—and won't rust.

A solo saddle model is also available, as well as the dual seat version. The solo seat model includes a large, strong luggage carrier and a pillion seat which fits on the carrier as standard equipment. You also have your choice of starting systems with this popular step-thru motorbike. You can choose easy push button electric starting, or the more economic kick starting system.

A neat, very useful luggage carrier to fit behind the dual seat is optional.

New pilot lamp makes sure others see you at dusk, in murky weather, etc.

All Hondas have automotive size lamps, easy-to-see turn signals, side reflectors, ball end control levers, powerful brakes and many other safe riding features.
